

# Installation Instructions & Ideas

## What is the "Dori Flagpole"?

If you're familiar with a Dori Pole®, it's very similar and utilizes the same high quality fiberglass telescoping pole but is configured for a standard 3' by 5' (or smaller) flag. The attaching hardware consists of Flag Rings instead of the Swiveling Yoke on the traditional Dori Pole.

The Dori Flagpole comes with two aluminum Flag Rings, one for each flag grommet. The top Ring is already tightened into position onto the fiberglass flagpole. The bottom Ring will need to be slid down to connect to the bottom grommet on your flag.

## Here's the procedure:

- Clip the carabiners onto the flag grommets.
- Attach the top carabiner (and top of flag) onto the top aluminum Flag Ring.
- Slide the bottom Flag Ring down the pole to meet the bottom flag grommet, so that the flag edge is taut.
- Tighten the set screw on the bottom Flag Ring with the Allen Wrench to secure placement.

Note: Keep the Allen Wrenches in the event that one of the Flag Rings loosens and to ease removing or changing the flag.

The 3-piece, telescoping Dori Flagpole uses the same three fiberglass pole sections as our 19' Dori Pole Pennant Pole. The top pole section with flag attachments is the only difference. You could even interchange the top sections, turning your Dori Pole into a Dori Flagpole or vice-versa, by purchasing a top section of pole for either Flag or Pennant.

## Mounting Hardware

All of the Dori Pole Pennant System mounting hardware for the 19' pole can be used to mount or install the Dori Flagpole. This includes the Dock Mount Kits, the Ground Stakes, Ground Sleeves, Pontoon Boat Mounts and Wheel Stands. See website for more information.

## The Dock Mount Kit

The Dock Mount Kit is all you need to mount your Dori Flagpole to a dock or similar surface. This is a complete kit that includes 24" aluminum, 2" O.D. pipe, heavy-duty mounting bracket with stainless steel bolts and brass lock nuts, and Dock Pole Bushing.

This convenient attachment method ships complete. The horizontal attaching bolts supplied are sized for standard aluminum and wood dock stringers.

## The Dori Flagpole Pontoon Mount

Designed to fit Pontoon Boats that have open top rails on sides and/or in front. This bracket is not designed to fit pontoon boats with full side panels.

-Easy installation for interior side mounting or onto front deck railing inside or outside.

It is also recommended to remove the Dori Flagpole when passing under objects such as: bridges, low hanging trees, or overhead cables.

Only tools needed are a power drill, 1/8" drill bit and a Phillips screwdriver. An Allen wrench is included with the Rail Clamp.

## The Dock Pole Bushing

If your dock has the typical 2" (outside diameter) aluminum dock post, the black Dock Pole Bushing is an easy way to buffer the fiberglass Dori Flagpole from wearing on the aluminum post. It fits snugly into the top of the post. Remember, place a horizontal stop, such as a bolt through your dock post at about 18" from the top to avoid the Dori Flagpole from going too far into the post (and water) and losing valuable height. The inside diameter of the standard post is about 1.80".

## The Dori Flagpole Ground Stake

Ground Stakes are considered "temporary" mounting simply because repositioning may be necessary occasionally due to prevailing winds allowing the stake to eventually tilt a bit in soft soil and sand which may require re-staking at a nearby location. The fiberglass pole slides over the ground stake and special bushing.

## The Dori Flagpole Ground Sleeve

Designed for permanent, concrete-set installations, for the Flagpoles, the Ground sleeve includes a 2" PVC pipe especially configured for encasing in concrete. The holes should be 8" to 10" in diameter and deep enough for the Ground Sleeve to protrude about 1/2" above the ground surface.

## The Wheel Stand

Easy to transport and set up, the Wheel Stand displays the 19' three-piece Dori Flagpole next to your vehicle. Folks will spot you from afar at crowded events. The Dori Flagpole is a great way to display your country or other flag for special occasions.
